

Let our instructors teach you to fly... It's Free!

- Are you new to R/C flying?
- Have you just purchased your first R/C airplane or helicopter?
- Have you been learning to fly on your own?
- Are you interested in being taught to fly R/C airplanes and helicopters?
- Do you want to know more about the sport?
- Do you need help with your model?
- Are you interested in building your own models?
- Would you like to earn your MAAC wings?
- Would you like to take your flying skills to the next level?
- Are you interested in talking to other pilots?
- Would you like to have liability insurance and a safe place to fly?
- Do you know how to handle a model safely to avoid injury to yourself and others?
- Are you interested in attending fun fly events, club seminars and auctions?

If you answered yes to any of these questions you should consider getting involved with the local R/C flying club. The Kingston Radio Control Modellers can help you get started in the sport, provide a safe place to fly, arrange for liability insurance, and its members can provide a wealth of information on every aspect of the sport.

In addition, the club has volunteer instructors who can help you learn to fly. An instructor can show you how to operate your model in a safe manner and will teach you the skills needed to earn your MAAC wings.

KRCM holds meetings on the third Monday of each month. If you are interested in coming out to a meeting you can get more information at: <http://www.krcm.org>. There are also fun fly events scheduled throughout the year that are open to the public. You're welcome to come out to an event and see what people are flying!
